IDENTIFIERS	Computer Searches; *Educational Resources Information Center; ERIC

ABSTRACT

Organizations which are currently providing computerized searches of the ERIC data base are listed and briefly described. For each of the over 120 sources of computer searches identifies in the document the following information is listed: name and complete address, population served, files available, how to submit an inquiry, form of search output, cost per search, turn around time, search system used, and miscellaneous notes. SURVEY OF ERIC DATA BASE SEARCH SERVICES

(Where to Obtain A Computerized Search Of The ERIC Files)

This document lists and describes briefly the organizations which are currently providing *computerized* searches of the ERIC data base. The intent is to include all sites providing search services on a regular basis—irrespective of whether the service is available only to a circumscribed community (e.g., state education department or university campus), or to all users without restriction.

Candidates for listing have come from various sources: subscribers to ERICTAPES, attendees at ERIC Data Base Conferences, users of one or more of the on-line services, those having continuing operating agreements with any of the major educational reference centers, and those appearing in the prior "directories" of which we are aware (i.e., those prepared by the ERIC Clearinghouse on Educational Management; the Center on Education, Development and Research of Phi Delta Kappa International; and Professor B. Flavian Udinsky of the University of Southern California).

All entries have been reviewed by the appropriate organizations for content and accuracy. However, recognizing that some organizations have undoubtedly been overlooked and that those listed will probably undergo change, it is intended that this survey be periodically updated and re-issued. Additions, changes, or corrections to this survey are, therefore, welcomed; they should be submitted to:

User Services Coordinator
ERIC Processing and Reference Facility
4833 Rugby Avenue, Suite 303
Bethesda, Maryland 20014
Telephone: (301) 656-9723

The survey is organized geographically, i.e., entries are grouped by state, and within state by city. Foreign entries appear at the end.

The columns subdividing each entry should be interpreted as follows:

ORGANIZATION

Contains the complete mailing address, telephone number, and person(s) to contact for further information. (See Table 1 for a list of organization acronyms.)

POPULATION SERVED

Indicates which groups that organization will serve. Organizations that do not restrict their clientele are identified by the notation "Open"; otherwise a qualifier identifying the specific population served is included (e.g., "Utah Educational Community").

FILES AVAILABLE

Indicates which ERIC files the organization has access to and how often they are updated. Major non-ERIC files that are accessible are also shown. However, all other data in this survey, such as costs and services provided, *apply only to searches of the ERIC files.* (In order to be consistent throughout the survey when referring to the various data bases, the acronyms shown in Table 2 have been used.)

INQUIRY SUBMISSION

Indicates how a request for a search should be submitted and the preferred format of such a request. The phrase "Natural language" is used to indicate that a simple narrative statement, describing specific subject areas and any other constraints, will suffice. Unless otherwise noted, specific ERIC Descriptors are not required. "Negotiation with requester preferred" indicates a process in which a staff member of the serving organization discusses the request with the requester prior to the actual running of the search, to insure understanding of the request and to resolve any ambiguities.

SEARCH OUTPUT

Indicates what the organization delivers back to the requester. *The term "Abstracts" is used here to mean complete bibliographic citations,* including cataloging, index terms, and abstract, i.e., the entire ERIC record or "resume." The term "Citations" is used to mean only bibliographic citations (i.e., all or part of the cataloging, but not the abstract). Generally, a citation includes accession number, title, author, publication date, Descriptors and Identifiers, price, availability, journal citation, and descriptive note; however, the exact content of a citation may vary slightly from system to system. "Accession number" refers only to ERIC-assigned numbers, that is, ED-prefixed numbers for RIE, and EJ-prefixed numbers for CIJE. "References" is used as a generic term, synonymous with "Hits," that can refer to any unit outputs of a search, either Abstracts, Citations, or Accession numbers.

COST PER SEARCH

Indicates the cost to run one complete rastrospective search of the ERIC files only. Costs for other services may occasionally be shown in the NOTES column.

TURNAROUND TIME

Indicates the typical elapsed time from when a request is submitted until it is returned to the requester. This varies considerably with the mode of distribution, particularly if material is mailed.

SEARCH SYSTEM USED

Identifies the name of the computer program used to process searches. Generally, a notation is made if the service organization itself does not actually run the searches, but has them run by another organization. For details about the capabilities of particular search software, contact either the originator (shown in Table 3), or the ERIC Facility.

NOTES

Used for miscellaneous relevant information, including other services provided in addition to retrospective searches, such as Current Awareness (or Selective Dissemination of Information) services where the requester is notified on a regular basis of new material entered into the system that is relevant to his interests.

DATE ENTRY PREPARED

Indicates when the data for that entry was last reviewed.

The two major suppliers of on-line access to ERIC data, Lockheed Information Systems and System Development Corporation, both maintain a large number of other files that are also available to their subscribers. Because of the number of such files, and the fact that new files are continuously being added, the status as of this writing is recorded in Table 4 and the abbreviated notations "All Lockheed Files" or "All SDC Files" are entered under FILES AVAILABLE where appropriate.

TABLE 1 – ORGANIZATION ACRONYMS

ACRONYM	ORGANIZATION NAME	CITY	STATE
ACES	Area Cooperative Educational Services	North Haven	Connecticut
AESP	Appalachian Education Satellite Project, University of Kentucky	Lexington	Kentucky
CBIS	Campus-Based Information System, University of Pittsburgh	Pittsburgh	Pennsylvania

TABLE 2 – DATA BASES REFERENCED

ACRONYM	FILE NAME (SOURCE)
AIM/ARM	Abstracts of Instructional Materials/Abstracts of Research Materials in Vocational and Technical Education (Center for Vocational and Technical Education, Ohio State Univ.)
API	Abstracts of Refining Literature (American Petroleum Institute)
BA Previews	Biological Abstracts (Biosciences Information Service)
BIORESEARCH Index	(Biosciences Information Service)
CA Condensates	Chemical Abstracts (Chemical Abstracts Service)
CAIN	Bibliography of Agriculture - Cataloging and Indexing (National Agricultural Library) Also known as the NAL file.
CICP	Current Index to Conference Papers (Macmillan Information)
CIJE	Current Index to Journals in Education (Macmillan Information)
CMA	Chemical Markets Abstracts (Predicasts)
COMPENDEX	Computerized Engineering Index (Engineering Index Inc.) Also known as the EI file.
CT	Chemical Titles (Chemical Abstracts Service)
EC	Exceptional Children Abstracts (Council for Exceptional Children)
EMA	Electronics Markets Abstracts (Predicasts)
FIDO	Fugitive Information Data Organizer (San Mateo Education Resources Center - SMERC)
FSTA	Food Science and Technology Abstracts (International Food Information Service)
GEO-REF	Geological Reference File (American Geological Institute)
GRA	Government Reports Announcements (National Technical Information Service) Also known as the NTIS file.
INFORM	Abstracted Business Information (ABI, Inc.)
INSPEC	Information Services in Physics, Electrotechnology, and Computers and Control (Institution of Electrical Engineers)
ITT	Textile Technology Digest (Institute of Textile Technology)
MARC	Machine Readable Cataloging (Library of Congress)
MEDLARS	Medical Literature Analysis and Retrieval System (National Library of Medicine)
MEDLINE	MEDLARS On-Line (National Library of Medicine) A subset of MEDLARS.
METADEX	Metals Abstracts Index (American Society of Metals)
NYT/IB	New York Times Information Bank (New York Times)
PA	Psychological Abstracts (American Psychological Assoc.)
PANDEX	Current Index to Scientific and Technical Literature (Macmillan Information)
RIE	Research in Education (National Institute of Education)
SCI	Science Citation Index (Institute for Scientific Information)
SPIN	Searchable Physics Information Notices (American Institute of Physics)
SSCI	Social Science Citation Index (Institute for Scientific Information)
STAR	Scientific and Technical Aerospace Reports (National Aeronautics and Space Administration) Also known as the NASA file.
TRANSDEX	Bibliography and Index to the United States Joint Publications Research Service (JPRS) Translations (Macmillan Information)
